Coordinated impact monitoring

Impact monitoring
46,595 monitoring stations

Artice 8 - 2,769 stations
The making of a new monitoring program

In January 2012 there will be a draft program that can be decided by the delegations in December 2012.

How?

• Use, improve and coordinate the ongoing monitoring.

• AND fill in the blanks with models and new stations.
Where, how, what and when?

Assess status, risk and the cause of environmental problems

Show the effects of the program of measures
Comprehensive planning

1. Analysis of the needs
2. Description of the present monitoring.
3. Analysis of the gaps
4. Priorities
5. A new program
The projects...

- Surveillance
- Operational
- Quantitative
- Investigative
- Monitoring in VISS
- Legal processes
Problems to be handled...

- No extra money
- No real control over the monitoring
- Practical problems - typology, identification of water bodies etc.
